1. Launch MS Access 2016.
2. On the start screen, select Blank database.
3. Enter a name for your database, e.g., "CustomerManagement.accdb".
4. Click Create. This creates a new, empty database ready for data entry.

Step 2: Creating Your First Table Tables are the foundation of any database, storing raw data.

1. Once the database opens, Access prompts you to create a table. Click Table.
2. Switch to Design View by right-clicking the table tab and selecting Design View.
3. Access will ask you to save the table; name it "Customers".

Designing the Table:

Field Name	Data Type	Description
CustomerID	AutoNumber	Unique identifier (Primary Key)
FirstName	Short Text	Customer's first name
LastName	Short Text	Customer's last name
Email	Short Text	Contact email
PhoneNumber	Short Text	Contact phone number
JoinDate	Date/Time	Date customer joined

4. Set CustomerID as the Primary Key by right-clicking the row and selecting Primary Key.
