3. **Time:** Duration of each session (e.g., 20-60 minutes).
4. **Type:** The mode of exercise (e.g., aerobic, resistance, flexibility).

Types of Exercise Prescriptions

Based on goals, prescriptions may include:

1. **Aerobic Exercise:** For cardiovascular health and endurance.
2. **Resistance Training:** To improve muscular strength and endurance.
3. **Flexibility Exercises:** To enhance joint range of motion.
4. **Neuromotor Exercise:** For balance, coordination, and functional fitness.
