Mastering Exposure and Image Quality

3. ISO Settings

- Range: 100–6400 standard; expandable to 25,600. - Best Practices: Keep ISO as low as possible for cleaner images. Increase ISO in low light but be mindful of noise, especially at higher settings. Expert Tip: Use auto ISO with a maximum limit in situations where lighting varies (e.g., events). This allows the camera to adapt while maintaining image quality.

4. Aperture and Shutter Speed

- Aperture: Controls depth of field. Wider apertures (f/1.8–f/3.5) produce blurred backgrounds. Narrower apertures (f/8–f/16) increase depth of field. - Shutter Speed: Influences motion blur. Use 1/60s or faster for handheld shots of subjects in motion. For slow shutter effects, use a tripod and slower speeds. List of Standard Settings: - Portraits: Wide aperture (f/1.8–f/4), moderate shutter speed. - Landscapes: Narrow aperture (f/8–f/16), slower shutter speed if tripod-mounted. - Sports: Fast shutter speed (1/500s+), moderate aperture.

Autofocus and Focus Tips

5. Autofocus Modes

- Single-Servo AF (AF-S): For still subjects; focus locks once achieved. - Continuous-Servo AF (AF-C): For moving subjects; focus adjusts continuously. - Auto-Area AF: The camera selects focus points automatically. - Dynamic-Area AF: Select a focus point; surrounding points assist if subject moves. - 3D Tracking: Tracks moving subjects across the frame. Expert Tip: Use AF-S for stationary objects and AF-C with 3D tracking for action shots like sports.

6. Focus Points and Selection

- Use the multi-selector to manually choose focus points for precise focusing. - For critical focus, select the center point and focus-recompose. - When shooting portraits, focus on the eyes for sharpness.

White Balance and Color Settings

- Auto White Balance (AWB): Good general choice; adaptively adjusts to lighting. - Preset WB: Choose from daylight, cloudy, tungsten, fluorescent, etc., for consistent color under specific lighting. - Custom WB: Use a gray card for perfect color accuracy in tricky lighting. Expert Tip: Shooting in RAW allows you to fine-tune WB in post-processing if needed.

Video Recording Tips

- Resolution & Frame Rates: Full HD at 60p/50p/30p/25p/24p. - Focus: Use AF-S for stationary subjects; AF-C for moving objects. - Sound: Use external microphone if possible for better audio quality. - Stabilization: Use a tripod or gimbal to avoid shaky footage. Additional: Enable the Movie Servo AF mode for continuous autofocus during recording, but note that it can cause focus hunting.

Using the Vari-angle LCD Screen

The fully articulating screen is invaluable for: - Shooting at awkward angles. - Vlogging or self-portraits. - Live view composition. Expert Tip: Use the screen for manual focus assistance via magnification or focus peaking (if available through firmware or external tools).

Connectivity and Sharing

- Wi-Fi: Although built-in Wi-Fi is not standard on D5200, an optional Nikon WU-1a adapter allows wireless image transfer. - HDMI

Output: For viewing on larger screens. - USB: For tethered shooting and firmware updates. Tip: Transfer images via Wi-Fi or USB for quick sharing on social media or backup.
