Early Roots in Ancient Civilizations

Western herbal medicine traces back thousands of years, with its origins deeply embedded in ancient civilizations such as Egypt, Greece, and Rome. In these cultures, herbs were often intertwined with spiritual and medicinal practices.

1. Egyptian Medicine: The earliest documented use of herbs in Egypt dates back to around 1500 BCE.

The Ebers Papyrus, one of the oldest known medical texts, lists hundreds of herbal remedies, showcasing a sophisticated understanding of plant-based treatments.

3. Roman Influence: The Romans inherited Greek knowledge and expanded upon it, with herbal gardens and apothecaries becoming central to medical treatment.

Medieval and Renaissance Periods

During the medieval period, herbal medicine became more institutionalized with the establishment of monasteries where monks cultivated medicinal plants. Texts such as the Herbals by various herbalists documented the uses of numerous herbs.

1. Herbals and Manuscripts: These texts served as manuals for physicians and herbalists, describing the properties and preparation of medicinal plants.
2. Trade and Exploration: The expansion of trade routes introduced new herbs from Asia and Africa, enriching European pharmacopeia.
