Understanding 4 and 6 Figure Grid References

Grid references are categorized based on their level of precision, primarily into 4-figure and 6-figure references.

4-Figure Grid References

- Comprise four digits, typically written as two pairs (e.g., 1234).
- Represent a square on the map, each side corresponding to a 1 km by 1 km area.
- Provide a general location within a 1 km square.

6-Figure Grid References

- Expand the 4-figure reference by adding an additional digit to each coordinate pair (e.g., 123456).
- Pinpoint a location within a 100 m by 100 m square.
- Offer a higher level of precision, ideal for detailed navigation.

How to Read and Use Grid References Effectively

Mastering grid references involves understanding the map grid system and practicing locating points.

Step-by-Step Guide to Reading Grid References

1. Identify the Grid Square: - Use the map's grid lines to find the approximate area. 2. Locate the Easting and Northing: - The first two digits (or three in 6-figure references) indicate the eastings (horizontal lines). - The last two digits (or three in 6-figure references) indicate the northings (vertical lines). 3. Refine the Position: - For 6-figure references, split the grid square into 10 smaller parts for precise location. 4. Mark or Find the Point: - Use the reference to identify the exact spot on the map.
