- Geometric characteristic symbols
- Datum references
- Tolerances (location, form, orientation, profile, and run-out)

Overview of ISO Geometrical Tolerance Standards The ISO standards relevant to geometrical tolerancing are primarily found in ISO 1101 and related standards. ISO 1101: Geometrical Product Specifications (GPS) – Geometrical Tolerancing ISO 1101 specifies the rules for defining and applying geometrical tolerances, including:

- Form tolerances (e.g., flatness, straightness, circularity)
