Common Symbols and Notations

| Symbol/Term | Description | ||| | Arrow | Water flow direction | | Circle with Lines | Pump or motor | | Box or Rectangle | Filter or heater | | Line with T or Cross | Pipe or tubing connection | | Valve symbol | Control valve or diverter |

Common Plumbing Configurations in Jacuzzi Hot Tubs

Understanding the typical configurations helps in comprehending various diagrams and their implications.

Series vs. Parallel Plumbing

- Series Plumbing: Water flows through components one after another. Simplifies flow but reduces pressure at each jet. - Parallel Plumbing: Water is split into multiple paths, maintaining pressure and flow rate at all jets.

Single Pump Systems

- Use one pump for both circulation and jets. - Simpler but may have limitations in jet power and flow control.

Dual Pump Systems

- Separate pumps for circulation and jets. - Offer better control, higher flow rates, and improved performance.

Combination Systems

- Use a combination of series and parallel plumbing to optimize flow and pressure.
