Usually measured in atmospheres (atm), pascals (Pa), or torr. - Volume (V): The space occupied by the gas, typically in liters (L) or cubic meters (m^3). - Temperature (T): A measure of the average kinetic energy of gas particles, expressed in Kelvin (K). - Amount of Gas (n): The number of moles of gas present, measured in moles (mol). Understanding these variables and their relationships is essential for grasping the gas laws.
