Many editions of the novella include page numbers, which are invaluable for precise reference and academic analysis. Here, we explore some of the most pivotal quotations, their contexts, and their thematic implications.

Major Quotes from Dr Jekyll and Mr Hyde with Page Numbers

The Duality of Human Nature

One of the most iconic themes of the novella is the duality within every human being. Stevenson encapsulates this in the following quotation: "Man is not truly one, but truly two." (Page 45 in most editions) Analysis: This succinct statement underpins the entire narrative. Stevenson suggests that each individual harbors conflicting impulses—good and evil—that coexist within the human psyche. The quote emphasizes that human nature is inherently divided, challenging notions of moral unity. It also foreshadows the internal struggle faced by Dr. Jekyll as he seeks to separate these aspects through scientific experimentation.

Jekyll's Reflection on His Transformation

Dr. Jekyll's internal conflict is vividly portrayed in his own words: "I stood already committed to a profound duplicity of life." (Page 78) Analysis: This quote reveals Jekyll's awareness of his moral compromise. The word "duplicity" indicates a dual life—one public and respectable, the other secret and depraved. Stevenson uses this reflection to explore themes of identity and the consequences of suppressing one's darker urges. It also illustrates Jekyll's recognition that his scientific pursuits have led him to a moral precipice.

Hyde's Manifestation of Evil

Mr. Hyde's emergence often signifies unrestrained evil, exemplified in this chilling quote: "It was Hyde that had really done the deed." (Page 102) Analysis: This statement signifies Hyde's complete embodiment of moral depravity, with Stevenson emphasizing the loss of Jekyll's moral control. The quote underscores Hyde's role as the personification of unchecked evil, and it raises questions about identity—whether Hyde is merely a manifestation or an independent entity. The use of "really" implies that Hyde's actions are a true reflection of the darker facets of human nature.

Character Development Through Quotes

Dr Jekyll's Self-Perception

Jekyll's introspective nature is evident in his description: "I was slowly losing hold of my original and better self, and becoming slowly incorporated with my second and worse." (Page 67) Analysis: This quote reveals Jekyll's growing concern that his experiments are eroding his moral integrity. The phrase "losing hold" conveys a sense of helplessness, emphasizing the destructive potential of suppressing one's darker side. Stevenson uses this to demonstrate how internal conflict can spiral into moral decay, aligning with the novella's exploration of the dangers of duality.

Hyde's Lack of Conscience

Hyde's amorality is starkly depicted in: "Mr. Hyde was pale and dwarfish; he gave an impression of deformity without any nameable malformation." (Page 19) Analysis: The physical description mirrors Hyde's moral deformity. Stevenson's portrayal of Hyde as physically unremarkable yet morally repugnant symbolizes the idea that evil can hide behind an ordinary appearance. This quote also highlights Hyde's unrestrained impulsiveness and lack of conscience, contrasting sharply with Jekyll's respectable facade.

Key Quotes and Their Thematic Significance

The Science of Duality

Stevenson's exploration of science and morality is encapsulated in: "It was thus rather the fear of the gallows than any love of evil, that inspired the boldest experiments." (Page 29) Analysis: This quote sheds light on Jekyll's motivation—his scientific curiosity is driven by a desire to understand and perhaps control the darker side of human nature, yet underlying this is a fear of social punishment. Stevenson hints at the dangerous intersection of scientific hubris and moral ambiguity. The quote invites reflection on how societal fears influence scientific pursuits and the moral boundaries researchers cross.

Hyde's Unrestrained Impulses

Hyde's reckless abandon is captured in: "He began to go wrong, wrong in the mind; and though of course I continue to take an interest in him, I see I come to the end of my patience." (Page 113) Analysis: This quote demonstrates the internal conflict faced by Jekyll as Hyde's influence grows. Stevenson uses Hyde's erratic behavior to symbolize the destructive power of unrestrained human impulses. It also underscores the tragic failure of Jekyll's experiment—his attempt to compartmentalize and control evil ultimately leads to its dominance.
