Implementation and Monitoring: Execute the financial plan and track performance regularly. Forecasting complements planning by predicting future financial outcomes, enabling proactive decision-making.

Capital Budgeting

Capital budgeting is a critical component of financial management, involving the evaluation of long-term investment projects. According to Prasanna Chandra, effective capital budgeting helps organizations allocate resources efficiently to projects that maximize value.

Key Techniques in Capital Budgeting

- Net Present Value (NPV): Calculates the present value of cash inflows and outflows to determine profitability. - Internal Rate of Return (IRR): Finds the discount rate that makes the NPV zero. - Payback Period: Measures the time required to recover the initial investment. - Profitability Index: Ratio of the present value of cash inflows to outflows.

Working Capital Management

Efficient management of working capital ensures the smooth functioning of day-to-day operations. Prasanna Chandra emphasizes maintaining an optimal balance between current assets and current liabilities.

Components of Working Capital Management

- Inventory Management: Maintaining appropriate stock levels. - Receivables Management: Ensuring timely collection of dues. - Payables Management: Managing payment schedules to suppliers. - Cash Management: Ensuring adequate liquidity for operational needs. External Sources

- Debt Financing: - Bank loans - Bonds and debentures - Equity Financing: - Issue of shares - Preference shares
Prasanna Chandra discusses the importance of choosing an optimal mix of debt and equity to minimize the cost of capital while maintaining financial flexibility.

Cost of Capital

The cost of capital is the minimum rate of return that a company must earn to satisfy its investors and creditors. It serves as a benchmark for investment decisions.

Components of Cost of Capital

- Cost of debt - Cost of equity - Cost of preferred stock
Prasanna Chandra emphasizes calculating the weighted average cost of capital (WACC) to evaluate investment projects and optimize capital structure.
